Vibactra Plus™ – A special combination of herbs demonstrated to enhance immunity through natural antibiotic, antioxidant and microscopic parasiticide activities.\*

Care Kits – Contains products specially formulated to help your pet overcome illnesses they may encounter. These kits include immunity enhancements to give added protection as well as reduce free radicals which are important for optimum health.\*

**DERMA NERV™**

**Organic**

**An herbal supplement formulated to aid in the relief from mental fatigue, poor memory, nerve pain, nervous tension, insomnia, and may help rebuild Nerves.**

Derma NERV is an all natural product developed to help issues that might be caused by nerve damage or hormone imbalances. Since the nervous system connects the various organs of the body to the brain, it is important to make sure that it is functioning properly. Damage to the nervous system can cause a wide variety of different ailments, ranging anywhere from, incontinence, anger, depression, hyperness, itching, pain, to more serious problems such as seizures.

Because nerve damage can effect so many things, it is important to keep a close eye on your animal after a fall, collision, abuse, or other types of physical trauma. Odd behavior or actions after any physical trauma may be a sign of nerve damage. Derma NERV may be able to help!

### Using Derma NERV to help with Nerve Damage :

Derma NERV may be used as an aid to help repair nerve damage. Many of the herbs in Derma NERV are designed to help the body repair damaged parts of the nervous system. If you suspect your pet may have a nerve related ailment, start your pet on Derma NERV 4x a day for 30 days. In most cases you should be able to see some obvious sign of improvement by the end of 30 days. If your pet is not responding, then Derma NERV may not be able to help. However, if you notice any signs of improvement, you may continue Derma NERV until improvements have stopped, or until two weeks after your pets symptoms have cleared. Take a 5 day break every 6 months.

### Using Derma NERV for Hyperactivity, ADHD, and to calm nerves in stressful events.

One particularly useful effect of Derma NERV is its calming properties. These properties can be used to calm down pets with ADHD, or who are just plain hyper. It may also be used to help calm down animals when a stressful event occurs such as fireworks, thunderstorms, travelling, or when you may have company over. To use Derma NERV for hyperactive animals, start by administering Derma NERV 1x a day. Adjust the dosage between 1-4x a day to get desired results. To calm your pet in a stressful event, administer Derma Nerv up to 3x a day. It is recommended to administer Derma NERV at least 6 hours before the event occurs if possible. For long term use of Derma NERV, take a 5 day break every 6 months.

### Using Derma Nerv to help with old age issues:

Unfortunately, as our pets start to age, their nervous system slowly starts to deteriorate. The deterioration of the nerves usually start as memory loss or incontinence. If your pet is suffering from memory loss or incontinence, Derma NERV may be able to help! Start by administering Derma NERV 3-4x a day (depending on severity) and continue without any breaks for up to 6 months. You should start to see some signs of improvement within the first two-three months. Continue Derma NERV until improvements have stopped, or until two weeks after your pets symptoms have cleared. Take a 5 day break every 6 months.

### Using Derma Nerv to help with Seizures:

If your pet is having seizures, it is always recommended to get them checked as soon as possible. There are many root causes of seizures, many of which Derma NERV will not help. Listed below are a few common root causes of seizures that Derma NERV will NOT help, and the common causes in felines:

- Brain Tumor
- Reaction to something in the environment
- Poisoning
- Liver Disease
- Hypoglycemia
- Inflammation of the brain

Although the list may be long of seizure roots that Derma NERV will not help, Derma NERV may be able to help you with the two most common root causes of seizures;

- Epilepsy
- Head Trauma.

Any animal is susceptible to head trauma. Any feline breed can be susceptible to epilepsy, however it is uncommon. Here is a list of a few common dog breeds that are highly susceptible to epilepsy.

- Beagles
- Retrievers
- Poodles
- German Shepherds
- Collies
- Huskies

If using Derma NERV to help with seizures, start by administering Derma NERV 2x a day. If 2x a day helps reduce the occurrence, or stops the seizures, you may reduce Derma NERV to 1x a day. If seizures continue to cease, you may discontinue Derma NERV. However, if 2x a day is not enough, you may increase Derma NERV to 3-4x a day. If no improvements are made, Derma NERV may not be right for your pet. If this is the case, please contact us about using Canine Distempaid for advanced cases of seizures. Every pet is different and so it is important to find the dosage that is right for your pet. Try to keep to lower doses if possible. Some animals may need to continue Derma NERV for long periods of time, or indefinitely. If this is the case, take a 5 day break after every 6 months. Results may take 3 days to appear.

### SUGGESTED USE FOR Derma NERV:

**Do not exceed the recommended dose!**  
Shake product well before use.

General Use: Administer orally 2-4 times per day according to the chart below for up to 60 days. If symptoms continue give 5 day break and start administering orally 2-4 times per day for another 60 days. Repeat as necessary, or until 2 weeks after symptoms clear.

Weight	Drops	ml/cc	Times daily
Under 3 lbs	2	0.06	2-4
3-10 lbs	5	0.15	2-4
11-25 lbs	10	0.3	2-4
26-80 lbs	13	0.39	2-4
81-150 lbs	15	0.45	2-4
151-250 lbs	20	0.6	2-4

**Caution:** Keep out of reach of children. As with any food product, herbs can antagonize allergies in your pet. Stop giving Derma NERV if you see any of the following: Rash, hives, edema (swelling), diarrhea, or blood in stools. If your pet has a reaction give charcoal and take to a veterinarian. (Have your vet treat for symptoms.) Do not Administer with Amber Technology's Kidney Rejuvenator, TYD, or Radox.

*Derma NERV has a 4-year shelf life.*
